SECOND HAND REFERENCE LIBRARY COLLECTION

COOPERATING LIBRARIES

References

The symbols L, L*, P, and M following the name of a library refer to the library's facilities for lending serials and for furnishing photocopies and microfilms.

L = The library lends serials.

L* = The library restricts its lending of serials. Applications should be made in each case.

P = The library furnishes photocopies.

M = The library furnishes microfilms.

See: Direct requests for service of titles under this library location symbol to new library location symbol. Collections have either been absorbed, merged, (and/or) are now serviced by *see* library.

See also: Two symbols are used for titles under this library location symbol. Consult *see also* library location symbol for complete list of holdings of titles in this library.

EXPLANATIONS

A. SPECIAL CHARACTERISTICS OF THE THIRD EDITION.

1. **Changes in entry and holding information.** Since entries in the second edition and the two supplements were not reissued in a checking edition, these entries stand in the third edition without change except in those instances where reports of bibliographical changes in titles were investigated and additional locations supplied. Entries and holdings were not updated otherwise. Additional locations were added within the limitations on holdings indicated by the policy decision of the Joint Committee. Numbers following a library symbol, therefore, show its holdings as of the second edition, the first or second supplement, or in the case of new titles, as of November 1, 1960.

2. **Filing and orthographical changes.** The filing arrangement of entries follows that of the second edition except in a few cases involving the arrangement of subordinate units of names or corporate bodies where minor variations in spelling have resulted from later changes in orthography and/or transliteration systems. These latter have been ignored and the new entries interfiled with the old. For example, institutes of the *Akademiia nauk U.R.S.R., Kiev* formerly transliterated as Institut, but now Instytut, are interfiled. Similarly commissions—formerly Komisya (now Komisja)—are interfiled when they occur as subdivisions under a larger body such as under *Polska akademia umiejętności, Krakow.*

3. **Ligatures.** Ligatures have been omitted from new entries in the Cyrillic alphabet.

4. **Capitalization.** Capitalization of entries in the second edition and in its supplements followed varying practices and these variations have been retained in the third edition. New entries follow the practice of the second edition.

5. **Corporate names.** In new or revised entries for corporate names, the names of subordinate divisions are entered directly under the corporate body with intervening administrative units omitted except when required for identification.

6. **Cross references.** Where a bibliographical change was made in either of the supplements a new reference was made from the immediately preceding entry only. References made from any earlier variation of the entry were not revised for the supplements. These references remain unrevised in the third edition unless a new change in the entry was reported. In the latter case all cross references were completely revised.

7. **Spacing.** The aperture expansion of the camera lens for "abstracting" purposes can vary from a minimum space of a single line to a maximum space of three and one quarter inches with a blank space appearing after each exposure. Consequently, blank spaces will appear under varying circumstances involving the same entry, the parts of which have been "abstracted" from different columns and camera interfiled into a single arrangement.

Blank spaces which occur in the bibliographical part of an entry when more than one exposure of the camera has been required for its assembly do not indicate omission of information. This assembly of a single entry from two or more sources sometimes leads to the variance indicated in Order of Notes (below).

8. **Order of notes.** The construction of new entries by "abstracting" the bibliographical parts from entries in the second edition and the two supplements has resulted in some instances in non-uniform sequence of bibliographical notes and terms.

9. **Order of holdings.** The order of holdings in the third edition is (1) symbols and holdings from the second edition; (2) symbols and holdings from first supplement; (3) symbols and holdings from second supplement; (4) symbols and holdings representing new and additional locations. Holdings are therefore not given in a single alphabetical symbol sequence as in the second edition. A blank space separates each new arrangement usually in the order above. But it should be noted that in entries involving a long list of holdings, this blank space indicates that more than one camera exposure was required.

Exceptions to this arrangement occur when symbols and holdings from one or both of the supplements or new locations were not too numerous and were transferred in manuscript to the listing in the second edition; and vice versa in the transferring of holdings in the second edition to a corrected form of entry appearing in one of the supplements.

10. **Deletions of holdings.** Deletions of library holdings have been erased or lined out in all cases reported. It should be noted therefore that a blank space in a list of holdings indicates that a deletion has been made.

11. **Asterisk (*) after a library symbol.** An asterisk (*) after a library symbol indicates that the holding was taken from the entry record for the title in the National Union Catalog and no effort was made to determine the extent of the library's holdings for the title.

12. **Obsolete symbols.** The following symbols used in the first and second supplements were not deleted for technical and other reasons.

- • preceding a title in the first supplement to indicate that it was new to the second edition
- ‡ change of title
- ⊗ main volume
- ① first supplement
- ▲ holdings are not to be recorded

B. GENERAL CHARACTERISTICS OF THE SECOND EDITION CONTINUED IN THE THIRD EDITION.

1. A serial not published by a society or a public office is entered under the first word, not an article, of the title.

2. A serial published by a society, but having a distinctive title, is entered under the title with reference from the name of the society.

3. Learned societies and academies of Europe, other than English, with names beginning with an adjective denoting royal privilege are entered under the first word following the adjective. These adjectives, Kaiserlich, Koniglich, Reale, Imperiale, etc., are abbreviated to K., R., I., etc., and are disregarded in the arrangement.

4. Colleges and universities having a geographical designation are entered under the name of the city, state or country contained in the title.

5. Observatories, botanical and zoological gardens, etc., not having a distinctive name, are entered under the name of the place in which they are located, unless affiliated with a university, in which case they are entered under the name of the university.

6. References have been made from earlier forms of a title and/or name of issuing body to latest form known, and in general whenever a reference might facilitate the use of the list. (N.B. See Note 6, Cross References in A above.)

7. Volume numbers and dates are inclusive in all cases and the dates are for the period covered by the serial, not those of publication.

8. A library's symbol is made up of a combination of letters for state, city and library. A symbol alone indicates the library holds the complete set.

9. A hyphen (-) between volume numbers or dates signifies "from and including the former to and including the latter."

10. A plus sign (+) indicates that the serial is currently received and that the set is complete from the last date or volume number given.

11. Parallels (||) indicate that publication ceased with the preceding date or volume.

12. Brackets ([]) indicate that the volumes or years so enclosed are not complete.

Tudományegyetem
Founded as Magyar királyi Ferenc József tudományegyetem in Cluj (Hungarian: Kolozsvár) in 1872, when Transylvania was part of Hungary. In 1919, after the cession of Transylvania to Rumania the university moved to Budapest, reopened in Szeged in 1921. After the Award of Vienna, Ag 30, 1940, by which Rumania ceded part of northern Transylvania to Hungary, the university returned to Cluj, and a new university, the M. Kir. Horthy Miklós tudományegyetem, was founded in Szeged. In 1945 a new Hungarian language university, the Universitatea de stat (later called Universitatea Bolyai) was created in Cluj. This new university and the Universitatea regele Ferdinand I (i.e. Cluj, Transylvania. Universitatea) took over the property of the Tudományegyetem in Jl 1945

Universitatea
Established 1919 as a Rumanian university in the location formerly occupied by the Hungarian university of Cluj. Name changed 1927 to Universitatea regele Ferdinand I. In 1948 name was changed to Universitatea "Victor Babeş." In 1958 it united with Universitatea Bolyai to form Universitatea "Babeş-Bolyai"
